SUMMARY

Network Engineer with 1+ year of experience supporting enterprise LAN/WAN infrastructure, network operations, endpoint management, and technical support for 200+ users. Skilled in TCP/IP, VLANs, DHCP, DNS, Active Directory, Microsoft Intune, Azure connectivity, and network monitoring. Experienced in troubleshooting network incidents, maintaining infrastructure availability, performing packet analysis, and documenting technical procedures. Familiar with Nmap, Splunk, Wazuh, Metasploit, and network diagnostic tools. Seeking to contribute networking and infrastructure support expertise in a Network Engineer or NOC Engineer role.

CORE SKILLS

- **Networking:** TCP/IP, VLANs, Inter-VLAN Routing, DHCP, DNS, NAT, Static IP Configuration, LAN/WAN Troubleshooting, Network Monitoring, Wireless Networking
- **Systems & Infrastructure:** Active Directory, Microsoft Intune, Microsoft Azure, Windows Server, Windows Administration, Ubuntu Linux
- **Security & Monitoring:** Wireshark, Nmap, Splunk, Wazuh, Burp Suite, Metasploit, Log Analysis, Vulnerability Assessment
- **Tools:** VMware Workstation, Cisco Packet Tracer, TeamViewer, UltraViewer

EXPERIENCE

Network Engineer L1 | Team Computers Pvt Ltd

Jan 2026 – Present

- Provided L1 network and desktop support for 200+ enterprise users, ensuring timely issue resolution and minimal downtime.
- Troubleshoot LAN/WAN, VPN, hardware, software, and connectivity-related issues.
- Configured and maintained switches, IP phones, printers, and end-user systems.
- Supported Active Directory administration, Microsoft Intune enrollment, and Azure user connectivity.
- Monitored network performance, bandwidth utilization, and device health to maintain network availability.
- Coordinated incident escalation with L2/L3 teams and maintained infrastructure documentation.

Network Engineer, TCP International Inc

May 2025 - Nov 2025

- Configured and maintained LAN/WAN network infrastructure and network devices.
- Implemented VLAN segmentation and inter-VLAN routing solutions.
- Managed DHCP, DNS, NAT, and network connectivity services.
- Monitored network performance and resolved connectivity issues.
- Performed hardware troubleshooting, endpoint support, and infrastructure maintenance.
- Utilized Wireshark for packet analysis and network troubleshooting.

PROJECTS

- **Office Network Simulation (Packet Tracer):** Designed and implemented a VLAN-based office network using Router-on-a-Stick architecture, DHCP services, and network segmentation.
- **Student ID Card System (Web-Based):** Developed a web-based college ID system with QR code profile display and complaint submission portal.
- **Metallurgical Inspection Report System:** Built a PHP-based system to display metallurgical test results and generate automated reports from a database.

EDUCATION

B.Sc. Information Technology | 75%

Government Arts College (Autonomous), Coimbatore | 2022 – 2025

CERTIFICATIONS

- Cisco Networking Essentials (Cisco) – 2025
- Google Cybersecurity Professional Certificate (Google) – 2025
- SOC Analyst Career Path (Cybrary) – 2025
